SUMMARY

Second-year B.Tech CSE (IoT) student passionate about problem solving, programming, and web development. Experienced in C, Java, and Python with a growing interest in Data Structures and modern web technologies. Eager to learn, build projects, and gain practical experience through internships.

EDUCATION

Bachelor of Technology

2024 – 2028

Poornima Institute Of Education and Technology

Bachelor of Technology in Computer Science with specialization in IOT

Poornima institute of education and technology

- Maintaining 9.0+ CGPA while simultaneously building full-stack projects and freelancing for real clients
- Solved 50+ DSA problems on LeetCode in C++
- Self-taught MERN Stack developer alongside academics

MY SKILLS

Programming Languages

C++, Java, JavaScript

Frontend Development

HTML, CSS, JavaScript, React, Bootstrap, Tailwind

Backend Development

Node.js, Express.js, EJS

Full Stack Development

MERN Stack (MongoDB, Express.js, React, Node.js)

Databases

MongoDB, MySQL

Data Structures & Algorithms

(Learning), Problem Solving

Developer Tools

Git, GitHub, VS Code, Postman, MongoDB Compass

PROJECT EXPERIENCE

Sweet Shop E-Commerce Website

- Developing a full-stack web application for an online sweet shop where users can browse products and place orders.
- Implementing features such as product listing, order placement, and Cash on Delivery system.
- Designing responsive user interfaces and working on backend integration for product management and order handling.
- Well Authenticated and secured.

WanderLust

live on github

- It is also my full stack project with complete database, I also live it on github so you can see it there, it can be used when we travel to another place and find best hotels for stay in there.
- It performs all CRUD operations, every user can do signup/login and also find the location of desired hotels

Postora

Portfolio Web Project

- Developed a personal portfolio website to showcase skills, projects, and achievements.
- Designed a clean and responsive user interface to improve user experience across devices.
- Used modern web technologies to build and structure the website efficiently.

COURSES

MERN full stack

Apna college

Full Stack Web Development

- Learned MERN Stack (MongoDB, Express, React, Node.js)
- Built multiple projects during the course
